1doc+ EMDM Robot Pharmacy

Powering Auto-Dispensing
of Prescription Medicine

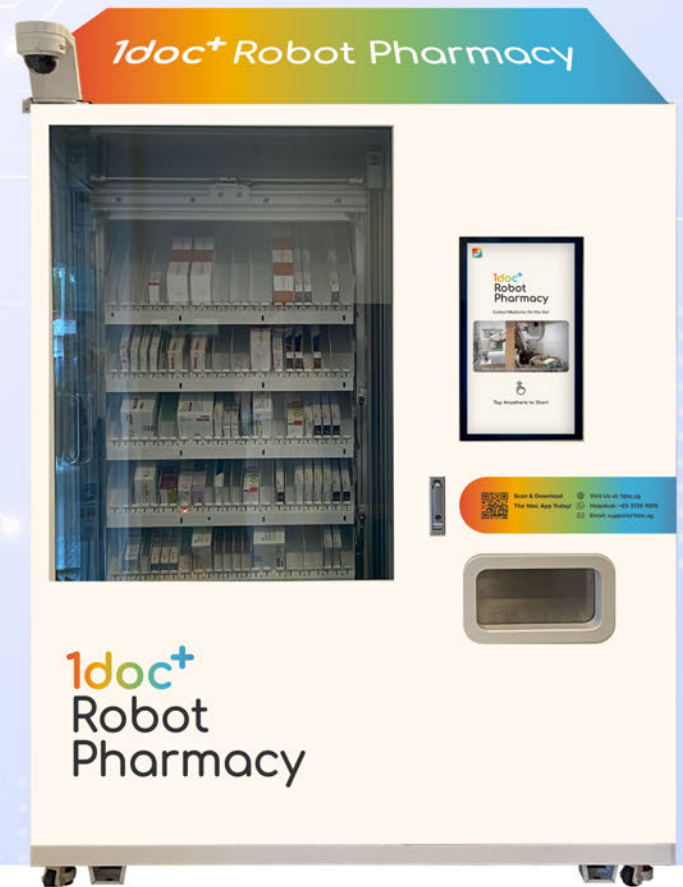

Introducing the 1doc EMDM Robot Pharmacy

The 1doc Electronic Medicine Dispensing Machine (EMDM) solution, or Robot Pharmacy, includes a fully automated warehouse with robotic arm technology, visual sorting, and autonomous mobile robots for streamlined medication processes.

As Singapore's **first automated prescription medicine machine for clinics**, the Robot Pharmacy seamlessly integrates with electronic medical record systems such as the NEHR and patient-centred personal health records, ensuring precision in dispensing of prescribed medication.

For high-volume clinics, the auto sorting and self-service dispensing machine ensures efficient medication organisation and dispensing. We also cater to small clinics and unmanned public spaces with a user-friendly self-service auto dispensing machine that adheres to clinic-compliant measures.

Benefits for your clinic

Save 1-2 manpower in Clinic Management

This saves you **\$3,000 - \$4,000 per month** for each manpower saved

Save manpower dedicated to Inventory Management

The system we have in place for automated dispensing and payments generates significant manpower savings by employing advanced inventory management. The streamlined efficiency of our system eradicates the requirement for extensive manual involvement.

Environmental Sustainability

As part of the MAS greenprint project, we are committed to reducing our ecological footprint. Every 1doc Robot Pharmacy will save 2 trees every month – that's a total of 24 trees every year. Rolling out to 50 clinics in the near future will result in saving 3,512 trees.

Support the HealthierSG Initiative

The 1doc EMDM Robot Pharmacy aids clinics in handling HealthierSG subsidies and private patients' medication. This auto-dispensing system frees clinics from inventory management, enabling greater focus on patient care.

Enjoy Additional 1doc App Integrations

Consumers can seamlessly access 1doc GPT, our in-app AI bot, to inquire about medication ingredients, manufacturing details, clinical trials, and potential side effects. This integrated feature enhances patient understanding and promotes informed decision-making.

Security and Data Privacy

At 1doc, security and data privacy are of utmost importance. Our system is built on a foundation of robust security measures, ensuring that patient data and sensitive information remain protected.

Here are some key security features:

- BDO Security Pentest
- AWS Cloud-based System
- Cybersecurity Act Singapore
- MOH SmartCMS & NEHR Security Infrastructure Certified
- ISO 13485 Certification
- PDPA Compliance Act
- IMDA Pre-approved Telemedicine

The 1doc EMDM Robot Pharmacy is a versatile system that integrates advanced robotics, image recognition, generative AI language transformer, RFID, EDI & Process Automation Technology, providing a comprehensive approach to healthcare services.

1doc EMDM Robot Pharmacy employs advanced robotics to streamline the dispensing of prescription medication, offering users a hassle-free experience. This eliminates the need for repetitive manual verifications each time users collect their prescribed medicines, making the process seamless and effortless.

Convenient & Accessible Service

The 1doc EMDM Robot Pharmacy can be deployed across Singapore island wide, bringing convenience to locations such as:

Healthcare Facilities

HDB Estates

Hotels

Tourist Attractions

Transport Hubs

Ship Vessels

Empowering Doctors,
Enhancing Patient Care,
Together with 1doc Robot Pharmacy.
